## ENVIRONMENT

### Eco-Friendly Holi Colors

---

Sacred saffron, resplendent red, sunny Yellow, Brilliant Blue—all natural colors from flowers and vegetables—make Holi festivities safe. For years, CLEAN-India has been campaigning against the highly toxic industrial colors and dyes used in Holi celebrations. These chemicals can cause anything from skin allergies to cancer, even blindness (see page 59). There are, however, healthful, colorful alternatives that can be made at home. The recipes are at [www.cleanindia.org/btonature/holi.htm](http://www.cleanindia.org/btonature/holi.htm). The site also gives alternates to dyes, including using flower petals

for throwing. While you are on the site, check out the tips for an Eco-Visarjana festival, and learn more about CLEAN-India, making India ecologically livable for the next generation.

## SOCIETY

### Gandhi's Nonviolence

---

One of the most inspirational and informative sites on nonviolence is the Gandhi Institute for Nonviolence ( [www.gandhiinstitute.org](http://www.gandhiinstitute.org)). Founded by Arun Gandhi, the grandson of Mahatma Gandhi, and his wife Sunanda, it seeks to prevent the violence that consumes our homes, our hearts and our societies. Deeply influenced by his grandfather, Dr. Gandhi gives examples of building peaceful relationships among people and communities. The brilliant advice, insightful articles and resources on nonviolence range from fasting to anger management. This site helps us clarify the vision of nonviolence and inspires us to "be the change we wish to see."
